

ABOVE GROUND Rainwater Harvesting Storage Tank

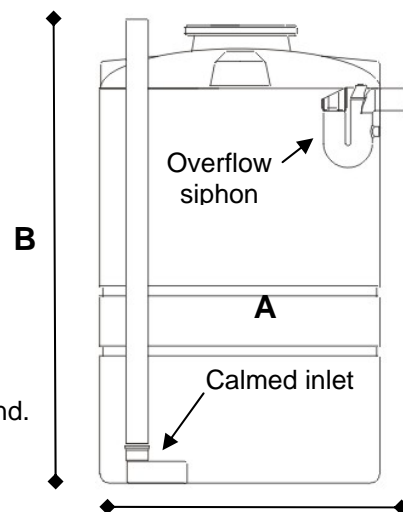

- The above ground storage tank enables storage of rainwater above ground or in basements.
- The tank can be delivered with all necessary equipment for the use of rainwater harvesting such as calmed inlet and overflow siphon.
- In order to create larger volumes additional tanks can be connected.

Item N°	Volume	diameter (A)	height (B)
G12100	2000 litres	1400mm	1675mm
G12101	3000 litres	1400mm	2290mm
G12102	4000 litres	1700mm	2190mm
G12103	6000 litres	2100mm	2150mm
G12104	9000 litres	2600mm	2350mm

Additional pipe connections can be made on demand.

The tanks are made of UV resistant polyethylene.
They are equipped with an access of 450mm diameter.
Note that tanks have to be installed on levelled and stable ground.
They have to be emptied in risk of frost.

Accessories:
